Hyderabad, India

PROFILE

Aspiring Frontend Developer with strong knowledge of HTML, CSS, JavaScript, Git, and GitHub. Passionate about building responsive and user-friendly web applications while continuously learning modern web technologies.

EDUCATION

- | | |
|---|----------------------------------|
| • U.V. Patel College of Engineering, Ganpat University
B.Tech in Computer Engineering - Artificial Intelligence | 2023 - 2027
CGPA: 6.76 |
| • Geethanjali Junior College, Nalgonda
Class XII | 2021 - 2023
Percentage: 93.1% |
| • MJPTBCWRIES School-kanagal, Nalgonda
Class X | 2020 - 2021
Percentage: 100% |

SKILLS

- **Programming Languages:** Python, C
- **Web Technologies:** HTML, CSS, JavaScript
- **Databases:** SQL, MySQL
- **Machine Learning & AI:** Machine Learning, Deep Learning, Natural Language Processing (NLP), Artificial Intelligence
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib
- **Tools & Platforms:** Git, GitHub, VS Code

CERTIFICATES

- | | |
|--|---------------------|
| • Deep Learning Fundamentals | IBM Cognitive Class |
| • Fundamentals of NLP: Preprocessing Text Using NLTK & SpaCy | Infosys Springboard |
| • Data Visualization With Python | IBM Cognitive Class |
| • Data Analysis With Python | IBM Cognitive Class |
| • Introduction to Fundamentals of Databases | Simplelearn |

PROJECTS

AI Crop Disease Detection Through Image

- Developed an AI-powered crop disease detection system using deep learning to identify plant diseases from leaf images.
- Trained and optimized a convolutional neural network (CNN) model on agricultural image datasets for accurate disease classification.
- Implemented image preprocessing, data augmentation, and model evaluation techniques to improve prediction performance.
- integrated disease diagnosis results with treatment and prevention recommendations to assist farmers in crop management.
- Built a user-friendly application for image upload, real-time disease detection.
